

GENERAL STUDIES (AA)

The program is designed to provide students with the opportunity to acquire basic principles and skills in the general education area while pursuing specific interests. It prepares students to enter into the Bachelor of Science General Studies degree or to transfer to another bachelor's program.

- The student will express ideas effectively through writing and speaking.
- The student will demonstrate use of technology.
- The student will develop their knowledge of various cultures with an emphasis on the Ochethi Sakowin culture.
- The student will demonstrate sound critical thinking skills and reflective processing of information to enhance problem solving.
